PROFESSIONAL SUMMARY

Software Engineer with experience in QA Automation, Web Application Development, and Performance Engineering through Apple's Internal Career Experience Program. Experienced building Python automation, Node.js APIs, Angular applications, and automated testing solutions for unreleased Apple software. Combines hands-on engineering experience with 6+ years of technical troubleshooting and current business operations experience in the consumer electronics industry.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Swift, HTML, CSS
Frameworks & Technologies: Angular, React, Node.js, Jest
Testing: Test Automation, Regression Testing, Manual Testing, Unit Testing, UI Testing, Performance Testing
Tools: Git, GitHub, Xcode, Radar, Confluence, Zoho Inventory, Google Sheets
Platforms: macOS, iOS

PROFESSIONAL EXPERIENCE

Freezia Trading LLC — **Miami, FL**
Business Operations Coordinator — *Jul 2025 – Present*

- Coordinated wholesale sales and fulfilled 15–50 customer orders daily by verifying invoices, preparing shipments, and ensuring accurate delivery of high-value consumer electronics to domestic and Latin American customers.
- Managed inventory operations for 500–5,000 serialized Apple devices processed daily by tracking product movement and maintaining accurate inventory records using Zoho Inventory and Google Sheets.
- Coordinated domestic and international logistics by preparing shipping documentation, verifying shipment contents, and collaborating with freight forwarding partners to ensure timely deliveries.

Apple Inc. — **New York, NY**
Technical Specialist — *May 2019 – Jul 2025*

Apple Internal Career Experience Program
QA engineer – Intern — *Jan 2025 – Jun 2025*

- Reduced manual regression testing time by developing Python automation scripts for unreleased iOS software, improving testing efficiency across multiple validation scenarios.
- Improved eSIM validation coverage by designing and executing manual test cases across 20+ real-world scenarios involving AT&T, Verizon, and T-Mobile on unreleased iOS builds.
- Improved defect resolution efficiency by logging, prioritizing, and validating software issues in Apple's Radar system while collaborating with cross-functional engineering teams.
- Reduced manual reporting time by developing a Python utility that transformed testing pipeline metadata into automated Excel KPI reports.

Performance engineering – Intern — *Jan 2023 – Jun 2023*

- Expanded automated test coverage across 42 Xcode target extensions by developing performance tests using Swift and Objective-C.
- Created Confluence documentation for Xcode target extensions, improving engineering onboarding and knowledge sharing.

Web application developer – Intern — *Jun 2021 – Nov 2021*

- Developed TypeScript services and Node.js APIs that automated engineering project data retrieval from Apple's Radar platform, improving data availability for internal tools.
- Built Angular components that visualized thousands of engineering projects, improving project tracking across Apple Media Products.

Technical Specialist

- Diagnosed complex hardware and software issues across iPhone, iPad, Mac, and Apple Watch using Apple diagnostic tools while consistently meeting service performance goals.
- Performed advanced troubleshooting and root-cause analysis for software, networking, and account-related issues while documenting reproducible defects for engineering teams.

EDUCATION

Bachelor of Science in Computer Science — **New York, NY**
City College of New York — *December 2020*
Meta & CodePath Cybersecurity Certificate
